# **Server installation**

The following chapter will give you an overview on how to install an maintain your RECS<sup>®</sup>|Box. When working on the RECS<sup>®</sup>|Box always wear **ESD protection** equipment.

## **Carrier replacement**

When removing a Carrier always **work very carefully** and **do not bend** the baseboards **nor use greater force** to get them into place.

# **Compute module installation**

When changing a module shut down all modules on the respective carrier and turn the power for the modules off in the managemant GUI. The rest of the system can stay powered.

#### SMARC module

Nvidia Jetson module

### M.2 card installation

### Fan replacement

A fan that has damaged blades schould be **replaced immediately**, because the bearing will break very fast due to the imbalance and resulting vibrations.

When changing a fan on a working system watch out that the system is not overheating during the changing process.
