

Service Root

This object represents the root Redfish service.

Redfish Schema Version: [v1.1.1](#)

GET

Request

```
GET /redfish/v1
Content-Type: applicaton/json
```

Authorisation

No authorisation required.

Response

Attribute	Type	Nullable	Description
Id	String	No	Uniquely identifies the resource within the collection of like resources.
Name	String	No	The name of the resource or array element.
Description	String	No	Provides a description of this resource.
RedfishVersion	String	No	The version of the Redfish service in format Major.Minor.Errata
UUID	String	No	Unique identifier for a service instance. The format of this string is a 32-byte value in the form 8-4-4-4-12. If SSDP is used, this value is an exact match of the UUID value returned in a 200OK from an SSDP M-SEARCH request during discovery. Client software should only treat the overall value as a universally unique identifier and should not interpret any sub-fields within the UUID.
AccountService	Object	No	Link to the Account Service
SessionService	Object	No	Link to the Session Service
Managers	Object	No	Link to a collection of Managers
Chassis	Object	No	Link to a collection of Chassis
Systems	Object	No	Link to a collection of Systems
EthernetSwitches	Object	No	Link to a collection of Ethernet Switches
PcieSwitches	Object	No	Link to a collection of Pcie Switches
ComposedNodes	Object	No	Link to a collection of Composed Nodes
Links	Object	No	Links to other resources that are related to this resource
Oem	Array	No	Collection of OEM extensions

Links

Attribute	Type	Nullable	Description
Sessions	Object	No	Link to a collection of active Sessions

OEM

Attribute	Type	Nullable	Description
RECS.Box	Object	No	OEM extension RECS.Box

RECS.Box

Attribute	Type	Nullable	Description
ApiVersion	String	No	Version of the RECS Box Redfish API in Format Major.Minor.Errata
