

Baseboard replacement

When removing a Baseboard always work very carefully and do not bend the baseboards nor use greater force to get them into place. Pay attention to the Newtork cables that are located right under the baseboards. They or the baseboards can be damaged if not handeled with care.

Com Express Baseboard

Remove the two M2,5 screws (B) with a T8 Torx screwdriver from the mSATA drive, and the four M3 screws (A) with a 5,5mm hexagonal nut.
