

Account Service

Account Service contains properties common to all user accounts, such as password requirements, and control features such as account lockout. It also contains links to the collections of Manager Accounts and Roles. This resource is used to represent a management account service for this Redfish implementation."

Redfish Schema: [AccountService v1.1.0](#)

GET

Request

```
GET /redfish/v1/AccountService
Content-Type: applicaton/json
```

Response

Attribute	Type	Nullable	Description
Id	String	No	Uniquely identifies the resource within the collection of like resources
Name	String	No	The name of the resource
Description	String	No	Provides a description of this resource.
Status	Object	No	The Status of this resource
ServiceEnabled	Boolean	Yes	Indicates whether this service is enabled
AuthFailureLoggingThreshold	Number	No	The number of authorization failures that need to occur before the failure attempt is logged to the manager log
MinPasswordLength	Number	No	The minimum password length for this service
MaxPasswordLength	Number	No	The maximum password length for this service
AccountLockoutThreshold	Number	Yes	The number of failed login attempts before a user account is locked for a specified duration (0=never locked)
AccountLockoutDuration	Number	Yes	The time in seconds an account is locked after the account lockout threshold is met. The value is greater or equal to AccountLockoutResetAfter. If set to 0, no lockout will occur
AccountLockoutCounterResetAfter	Number	No	The interval of time in seconds since the last failed login attempt at which point the lockout threshold counter for the account is reset to zero. The value is less than or equal to AccountLockoutDuration.
Accounts	Object	No	Link to a collection of Manager Accounts
Roles	Object	No	Link to a collection of Roles

Attribute	Type	Nullable	Description
PrivilegeMap	Object	No	Link to the Privilege map defining the privileges needed to perform a requested operation on a URI associated with this service
