

Service Root

GET

Request

```
GET /redfish/v1
Content-Type: applicaton/json
```

Authorisation

No authorisation required.

Response

Attribute	Type	Nullable	Description
Id	String	No	Uniquely identifies the resource within the collection of like resources.
Name	String	No	The name of the resource or array element.
Description	String	No	Provides a description of this resource.
RedfishVersion	String	No	The version of the Redfish service in format Major.Minor.Errata
UUID	String		Unique identifier for a service instance. The format of this string is a 32-byte value in the form 8-4-4-4-12. If SSDP is used, this value is an exact match of the UUID value returned in a 200OK from an SSDP M-SEARCH request during discovery. Client software should only treat the overall value as a universally unique identifier and should not interpret any sub-fields within the UUID.
AccountService	Object		Link to the Account Service
SessionService	Object		Link to the Session Service
Managers	Object		Link to a collection of Managers
Chassis	Object		Link to a collection of Chassis
Systems	Object		Link to a collection of Systems
EthernetSwitches	Object		Link to a collection of Ethernet Switches
PcieSwitches	Object		Link to a collection of PCIe Switches
ComposedNodes	Object		Link to a collection of Composed Nodes
Oem	Object		OEM extension "RECS.Box":
Links	Object		Contains references to other resources that are related to this resource.
